

SuperOffice Outlook Synchronization

The ultimate bridge between SuperOffice and Outlook. Register all your appointments, contacts and task just once, using PC, PDA or SmartPhone and get the most out of your CRM system.

- Two way synchronization of your SuperOffice diary and tasks with Outlook. Ideal for companies that use Outlook as corporate calendar system.
- Synchronizes your SuperOffice contacts (related to appointments or tasks) and your personal SuperOffice Selection with Outlook contacts.
- All features from Outlook calendar are supported, like all-day events and recurring appointments.
- Keeps every PDA or (Smart)phone that supports Outlook sync capabilities up to date. Calendar, contacts, birthday's and to-do's are always up to date when you are on the road.
- Outlook calendar, tasks and contact folder on the Exchange server are always up to date for quick synchronization.
- IT requirements:
 - Server based installation
 - All local Outlook versions are supported, as long they synchronize with Exchange.
- Wireless update of your PDA or (Smart)phone with Exchange when using MS mobile services/Activesync.

- Synchronization using SuperOffice Outlook Synchronization
- Seamless integration based on Microsoft Technology
- Server based solution, one application Sync's all
- Support for SuperOffice Windows, CRM5.web and Citrix
- Extremely fast synchronization
- Perfect solution for all SuperOffice customers, also Large Accounts
- Works excellent with PDA, Smartphone (supports MS ActiveSync)

InfoBridge provides the bridge between business critical applications!
